

Edge FM supports real, local human artists and seeks to foster human connection. We endeavour to protect creators from unfair competition...

AI music policy for 93.7 Edge FM (2026):

Edge FM (Bega Access Radio) does not broadcast wholly AI-generated music.

As a community radio station and organisation 93.7 Edge FM supports real, local human artists, and as far as possible fosters genuine human connection, and protects creators from unfair competition.

93.7 Edge FM will not broadcast or mix undisclosed, mass-generated AI content into our human-created music catalogues.

Presenters may choose to play partially AI-generated music when the artist has provided full disclosure, including where and to what extent AI was used, the programs used and evidence that the relevant service was legitimately accessed.

This material, if played to air, is to be labelled “AI Generated Music” and announced as such at the time of broadcast by the presenter.
